

Supply Chain Manager - Ultrahuman

Job Type: Full-time | **Experience:** 8–10 years | **Location:** Bengaluru

Company Overview

Ultrahuman is a profitable, fast-scaling health-tech company on track for a ~\$500M valuation. We are revolutionizing metabolic health through wearable technology, real-time analytics, and powerful digital platforms.

Our mission is to help people live healthier, longer, and stronger lives. If you're passionate about the intersection of health, technology, and performance, and want to join a purpose-driven, high-impact team — this is your moment.

Required Qualifications

- Bachelors/masters degree in any of the following Supply Chain Management, Logistics, Operations Management, Industrial Engineering, Business Administration (MBA)
- Expertise in Supply chain optimization, Inventory management and Lean Methodologies
- Expertise in Procurement and sourcing, Supplier relationship management
- Expertise in Demand planning and forecasting
- Expertise in Data analysis and reporting
- ERP and supply chain software proficiency (e.g., SAP, Oracle)
- Excellent communication and stakeholder management
- Proven leadership and team management abilities
- Ability to drive cost reduction initiatives

Preferred Qualifications

- Experience with global supply chain operations
- Knowledge of regulatory compliance and quality standards

Key Responsibilities

- Lead end-to-end supply chain operations—from raw material procurement and vendor coordination to logistics and inventory—ensuring timely, cost-effective, and quality delivery.
- Build and manage strong relationships with suppliers and PCB assemblers; lead negotiations to optimize costs, credit terms, and supply reliability within the electronics ecosystem.
- Ensure availability of critical materials through accurate demand planning and proactive lead time management to avoid production bottlenecks or overstocking.
- Drive supply chain efficiency and cost savings by analyzing pricing, vendor performance, and operational workflows to optimize procurement, warehousing, and distribution.

- Utilize ERP systems and supply chain KPIs to monitor performance, support strategic decisions, and improve end-to-end supply chain agility and resilience.

What You'll Learn

- Get a head-start on the coming manufacturing revolution in India by working with a company creating cutting-edge, IP protected consumer electronics
- Gain end-to-end exposure to supply chain functions including procurement, logistics, and demand forecasting.
- Master the use of advanced analytics and ERP tools to drive decision-making and efficiency.
- Develop leadership, negotiation, and cross-functional collaboration skills in a fast-paced environment.
- Prepare for senior leadership roles by building deep expertise in risk management, cost control, and supply chain strategy.

Benefits & Perks

- Employee Stock Option Plans (ESOPs) — become a shareholder in our growth journey
- Travel outside of India to learn global best practices
- Complimentary Ultrahuman products
- Comprehensive insurance coverage (OPD, IPD, maternity)
- Free meals and snacks
- Gym membership reimbursement
- Wi-Fi reimbursement for remote work
